Fly Control for Feedlots Guide

A fly control for feedlots guide that outlines sanitation, trapping and treatment steps for managing flies around feed yards. Print it and keep it handy where the work gets done.

Farm / unit: _____ Date: _____ By: _____

1. Find where flies breed
2. Remove wet manure and feed spills
3. Keep drainage clear
4. Set and check traps
5. Choose products per the label
6. Rotate product types
7. Record results by pen
8. Review the plan each season

YOUR NOTES

TIP Cleaning up wet spots does more than spraying, so make sanitation the first step each season.
