Beef Cattle | WORKSHEET

Stocking Rate Calculator

A stocking rate calculator worksheet for working out how many animals a pasture can carry, using the producer's own forage and animal size figures. Print it and keep it handy where the work gets done.

Farm / unit: _____ Date: _____ By: _____

Pasture name and acres _____

Forage type and condition _____

Estimated forage available _____

Animal class and weight _____

Days of grazing planned _____

Forage left for rest and wildlife _____

Calculated animals supported _____

Notes from NRCS or extension _____

NOTES / CALCULATIONS

TIP Use stocking guidance from your local NRCS or extension office, and recheck as seasons and forage conditions change.
