Corn Nitrogen Management Guide

This Corn Nitrogen Management Guide helps growers plan the source, timing and placement of nitrogen for corn. Fill it in by hand and keep it with your farm records for later seasons.

Farm / unit: _____ Date: _____ By: _____

1. Review previous crop and its nitrogen credit
2. Note soil organic matter and texture
3. Choose nitrogen source for the field
4. Decide on timing: preplant, sidedress or split
5. Plan placement and application equipment
6. Consider leaching and loss risk on the field
7. Account for manure or other nutrient credits
8. Record rate applied and weather after application

YOUR NOTES

TIP Use your state's recommended nitrogen rate tool and soil test, and write down what you actually applied on each field.
