Crop Rotation Pest Management Guide

This Crop Rotation Pest Management Guide helps growers use rotation to break pest cycles. Fill it in by hand and keep it with your farm records for later seasons.

Farm / unit: _____ Date: _____ By: _____

1. List crops grown last several seasons
2. Note main pests and diseases by crop
3. Pick rotations that break pest cycles
4. Watch for weeds favored by each crop
5. Plan herbicide modes of action across years
6. Consider cover crops in the rotation
7. Note volunteer crop control
8. Record pest changes after rotation

YOUR NOTES

TIP Keep field-by-field history, since pest pressure often tracks what was grown there before.
