# Grain Aeration Controller Settings

This Grain Aeration Controller Settings helps growers document aeration controller programming for each bin. Fill it in by hand and keep it with your farm records for later seasons.

Farm / unit: _____ Date: _____ By: _____

1. Bin name and grain type
2. Controller make and model
3. Fan start and stop mode
4. Temperature and humidity sensor locations
5. Season: fall, winter or spring
6. Set points from local guidance
7. Last calibration or sensor check date
8. Notes on fan runtime and grain response

## YOUR NOTES

**TIP** Check controller settings against extension advice each season, and verify sensors read correctly before relying on them.
