Grain Storage Management Guide

This Grain Storage Management Guide helps growers keep stored grain in good condition through the season. Fill it in by hand and keep it with your farm records for later seasons.

Farm / unit: _____ Date: _____ By: _____

1. Clean bins and equipment before filling
2. Check bin roof, walls and doors for leaks
3. Confirm grain is at safe moisture for storage
4. Level or core the grain after filling
5. Run aeration fans per the operator's manual
6. Check grain temperature and condition on a schedule
7. Watch for insects, mold and crusting
8. Plan unloading order and record quality

YOUR NOTES

TIP Walk the bin tops and check grain on a regular schedule, and never enter a bin without a safety plan.
