Soil Respiration Test Protocol

This Soil Respiration Test Protocol helps growers run a soil respiration test. Fill it in by hand and keep it with your farm records for later seasons.

Farm / unit: _____ Date: _____ By: _____

1. Choose sampling sites
2. Check soil moisture and temperature
3. Prepare soil sample or in-field setup
4. Follow the test kit instructions
5. Record reading time and result
6. Repeat at several spots
7. Compare across years
8. Record weather and management

YOUR NOTES

TIP Follow the kit or lab instructions exactly and repeat at similar soil moisture.
