Wheat Weed Control Guide

This Wheat Weed Control Guide helps growers plan weed control in wheat. Fill it in by hand and keep it with your farm records for later seasons.

Farm / unit: _____ Date: _____ By: _____

1. List main weeds seen last season
2. Note any known herbicide resistance
3. Plan fall or spring timing
4. Match products to weed and wheat stage
5. Check label restrictions and rotational limits
6. Consider seeding rate and competition
7. Plan escape and seed bank cleanup
8. Record products, dates and results

YOUR NOTES

TIP Read the label for crop stage and next-crop restrictions, since those catch many growers after wheat.
