Dairy | GUIDE

Calf Care SOP

A calf care SOP for dairy farms outlining the daily steps of feeding, housing, health checks and cleaning so all calf workers follow the same routine.

Farm / unit: _____ Date: _____ By: _____

1. Prepare clean feeding equipment
2. Feed colostrum and milk per plan
3. Check each calf's appetite and manure
4. Provide fresh water and starter
5. Clean and bed pens
6. Isolate sick calves
7. Treat only per veterinary protocol
8. Wash hands between calves
9. Record all feedings and health notes

YOUR NOTES

TIP Review the SOP with your veterinarian and update it when calf health patterns change.
