Fly Control Plan for Dairy

A fly control plan template for dairy farms to outline sanitation, monitoring and control steps in barns, calf areas and manure storage during fly season.

Farm / unit: _____ Date: _____ By: _____

Fly problem areas mapped

Manure and wet spot cleanup plan

Calf hutch and bedding sanitation

Monitoring method used

Control products chosen per label

Biological control options

Treatment dates and notes

Staff responsible

Review of results

TIP Sanitation does most of the work, so start there and use products only as the label and your adviser direct.
