Milking Routine SOP

A milking routine SOP for dairy workers laying out the order of steps from cow prep through unit removal and teat dipping so every shift milks the same way.

Farm / unit: _____ Date: _____ By: _____

1. Wash hands and put on gloves
2. Check cow and udder before prep
3. Strip foremilk and watch for abnormal milk
4. Clean and dry teats
5. Attach units promptly
6. Adjust units during milking
7. Remove units gently
8. Dip teats after milking
9. Record problems and treated cows

YOUR NOTES

TIP Train new milkers on the SOP beside an experienced milker and check their routine regularly.
