Cost of Production Calculator for Vegetables

A calculator worksheet for working out the cost of producing vegetables per unit sold. Helps growers see which crops earn money after seed, labor and packing.

Farm / unit: _____ Date: _____ By: _____

Crop and area planted _____

Seed or transplant costs _____

Soil and fertility costs _____

Irrigation and water costs _____

Labor for planting, care and harvest _____

Packing materials and cooler costs _____

Marketing and delivery costs _____

Total yield sold _____

Cost per unit sold _____

NOTES / CALCULATIONS

TIP Time your labor for each crop, since labor is often the biggest cost and the easiest to miss.
