Cost of Production Worksheet

A worksheet for adding up every cost of producing a crop or livestock product, then dividing by output. Farmers use it to set prices and decide whether an enterprise pays.

Farm / unit: _____ Date: _____ By: _____

Enterprise and production year _____

Total acres or head _____

Seed, feed and stock costs _____

Fertilizer and crop protection _____

Labor and management time _____

Machinery, fuel and repairs _____

Land rent or ownership cost _____

Interest and overhead _____

Cost per unit produced _____

NOTES / CALCULATIONS

TIP Include your own labor and land costs so the true figure shows. Compare against your actual selling price.
