Farm Emergency Water Supply Plan

A farm emergency water supply plan template for owners to list people and livestock needs, storage, hauling, backup sources, and treatment before a drought or outage.

Farm / unit: _____ Date: _____ By: _____

People and animals served

Daily water needs estimate

Primary water source

Backup sources

Storage tanks and containers

Hauling plan and equipment

Treatment and testing notes

Power needs for pumps

Contacts for suppliers

TIP Ask your extension office or health department about safe water treatment, and test backup sources before you need them.
