Hydraulic Safety Guide

A hydraulic safety guide with ordered steps for farm workers on relieving pressure, checking hoses, avoiding fluid injection injuries, and servicing hydraulic equipment safely.

Farm / unit: _____ Date: _____ By: _____

1. Read the operator's manual first
2. Lower implements to the ground
3. Shut down and relieve pressure
4. Never use hands to find leaks
5. Use cardboard or a tool to check
6. Inspect hoses and fittings
7. Replace worn hoses promptly
8. Seek medical care for any injection injury
9. Record repairs made

YOUR NOTES

TIP Fluid injected under the skin is an emergency, so get medical care immediately even if the wound looks small.
