Cold Stress Water Management Guide

A guide to managing livestock water in cold weather. Owners use it to prevent freezing and keep animals drinking through winter.

Farm / unit: _____ Date: _____ By: _____

1. Inspect heaters and wiring early
2. Insulate pipes and tanks
3. Break or remove ice daily
4. Keep access areas safe and clear
5. Check electrical safety
6. Consider heated or frost free options
7. Keep a backup water source
8. Watch for animals not drinking
9. Record problems for next winter

YOUR NOTES

TIP Check every waterer each day in cold snaps and use only cords and heaters rated for outdoor use.
