Feed Cost Per Unit of Production Calculator

A calculator worksheet for finding feed cost per unit of production, such as per pound of gain or per unit of milk or eggs. Producers use it to judge profit.

Farm / unit: _____ Date: _____ By: _____

Animal group and product _____

Period covered _____

Total feed cost for the period _____

Total production for the period _____

Cost per unit worked out _____

Other costs to compare _____

Benchmark used for comparison _____

Change to consider _____

NOTES / CALCULATIONS

TIP Include waste and storage losses in feed cost so your figure reflects what you really paid.
