Feed Formulation Software Guide

A guide to choosing and using feed formulation software. Farm managers and nutritionists use it to set up animals, feeds and goals before running rations.

Farm / unit: _____ Date: _____ By: _____

1. List the species and groups you feed
2. Choose software that supports them
3. Enter animal descriptions and goals
4. Load feeds with lab analyses
5. Set limits for feed amounts and costs
6. Run the ration and review results
7. Check output with your nutritionist
8. Save versions and notes for later

YOUR NOTES

TIP Software only works as well as the data entered, so check each feed analysis before running a ration.
