Feed Mill Lockout/Tagout Procedure

A guide to lockout and tagout steps for feed mill equipment. Workers use it as a reference to de-energize machines before servicing.

Farm / unit: _____ Date: _____ By: _____

1. Tell affected workers about the shutdown
2. Identify all energy sources
3. Shut down using normal controls
4. Isolate each energy source
5. Apply your own lock and tag
6. Release stored energy
7. Test that the machine will not start
8. Do the work, then clear tools and people
9. Remove locks only by the person who set them

YOUR NOTES

TIP Follow your written program and OSHA lockout rules, and train every worker on the equipment.
