Heat Stress Water Management Guide

A guide to managing water supplies for livestock during heat. Owners use it to keep animals drinking and spot problems fast.

Farm / unit: _____ Date: _____ By: _____

1. Check water supply before heat arrives
2. Add tanks or drinkers where needed
3. Keep water clean and shaded
4. Check flow and refill rates often
5. Watch for animals crowding waterers
6. Provide shade near water
7. Avoid handling animals in peak heat
8. Know signs of heat stress
9. Call a veterinarian if concerned

YOUR NOTES

TIP Check troughs more often than usual during hot spells and have a backup plan for outages.
