Ration Balancing Worksheet for Poultry

A ration balancing worksheet for poultry. Producers and nutritionists use it to list animal needs, feeds on hand and the resulting ration, then compare supply against requirements.

Farm / unit: _____ Date: _____ By: _____

Animal group and stage (flock) _____

Body weight or size, per scale or tape _____

Production stage or goal _____

Feeds available and their analysis _____

Amount of each feed offered _____

Nutrient needs per approved reference _____

Shortfalls or excesses found _____

Changes planned and who approved them _____

NOTES / CALCULATIONS

TIP Use requirement tables from your extension office or nutritionist, and recheck the ration whenever feed lots change.
