# Forage Cost of Production Calculator

A worksheet for working out forage production costs, so farmers can see what hay, silage or pasture costs them. Work through it top to bottom, using your own records, and revisit it when conditions change.

Farm / unit: _____ Date: _____ By: _____

Forage type and acres _____

Seed and establishment costs _____

Fertilizer and lime _____

Fuel and labor _____

Machinery costs _____

Land cost or rent _____

Total production cost _____

Yield and cost per unit _____

**NOTES / CALCULATIONS**

**TIP** Use your own farm records and ask your extension office for budget templates.
