Forage Seeding Rate Calculator

A fill-in worksheet for working out how much forage seed to buy for each field, using your own seed labels and planting recommendations, for producers planning a seeding.

Farm / unit: _____ Date: _____ By: _____

Field name and acreage _____

Forage species or mix _____

Planting method _____

Recommended rate per local guidance _____

Seed purity and germination from the tag _____

Adjustment for seed quality _____

Total seed needed for the field _____

Seed supplier and lot _____

NOTES / CALCULATIONS

TIP Take the recommended rate from your extension office or the seed tag, and recheck the drill or spreader calibration before planting.
