Grazing Height Chart

A reference chart for grazing height by forage species, showing start and stop heights to protect regrowth, used by graziers moving animals between paddocks. Work through the steps in order, and keep notes on what you decide for future reference.

Farm / unit: _____ Date: _____ By: _____

1. Species and forage type
2. Height to begin grazing
3. Height to stop grazing
4. Notes on growth habit
5. Seasonal adjustments
6. Regrowth signs
7. Stick or ruler method
8. Local source of targets

YOUR NOTES

TIP Take the target heights from your local extension recommendations and keep the chart in the truck.
