No-Till Pasture Renovation

A guide to renovating pasture with no-till methods, from stand assessment to seeding and grazing control, for producers avoiding tillage. Use it as a reference in the field or office, and adapt the steps to your own operation.

Farm / unit: _____ Date: _____ By: _____

1. Assess the existing stand
2. Take soil samples and correct fertility
3. Control competition from old sod
4. Choose species and seed
5. Calibrate the no-till drill
6. Seed at the right time
7. Manage grazing on new seedlings
8. Record results and follow-up

YOUR NOTES

TIP Follow the herbicide label if you use one and ask your extension office about local timing.
