# Water System for Rotational Grazing

A guide to planning livestock water for rotational grazing, covering sources, pipelines, tanks and freezing, for graziers who want water in every paddock. Work through the steps in order, and keep notes on what you decide for future reference.

Farm / unit: _____ Date: _____ By: _____

1. Locate the water source and rights
2. Map paddocks and tank sites
3. Choose pipeline and tank type
4. Plan for flow and animal demand
5. Protect tanks from trampling
6. Plan for winter freeze protection
7. Set up a regular inspection routine
8. Record repairs and upgrades

## YOUR NOTES

**TIP** Check your state water rules and ask NRCS about cost share before you build a system.
