Fir Management Guide

A fir management guide for owners of fir stands. It lists steps for stand checks, pest watching, and planning thinning or harvest.

Farm / unit: _____ Date: _____ By: _____

1. Map the fir stands
2. Identify species present
3. Check tree health
4. Watch for pests and disease
5. Note regeneration
6. Plan thinning
7. Plan harvest
8. Protect soil and water
9. Review the stand each year

YOUR NOTES

TIP Ask your forester which fir pests are active in your region and how to spot them.
