Forestry & Agroforestry | WORKSHEET

Forest Carbon Inventory Worksheet

A forest carbon inventory worksheet for recording tree and woody material data used in carbon estimates. Use it to gather measurements your forester or program can work from.

Farm / unit: _____ Date: _____ By: _____

Stand name _____

Plot identifier _____

Live tree species _____

Tree diameters measured _____

Tree heights measured _____

Standing dead trees _____

Downed wood noted _____

Soil or litter notes _____

Calculation method used _____

NOTES / CALCULATIONS

TIP Use the measurement method required by any carbon program you are considering, and ask them for their forms first.
