Forestry & Agroforestry | WORKSHEET

Forest Carbon Sequestration Calculator

A forest carbon sequestration calculator worksheet for collecting data used to estimate stored carbon. Use it to organize field inputs before applying a calculation method.

Farm / unit: _____ Date: _____ By: _____

Stand name _____

Stand area _____

Tree species present _____

Tree sizes measured _____

Stand age estimate _____

Growth notes _____

Dead wood notes _____

Calculation method used _____

Source of conversion factors _____

NOTES / CALCULATIONS

TIP Use a method recognized by your program or forester, and keep your field data with the results.
