Forest Soil Testing Protocol

A forest soil testing protocol for collecting soil samples from woodland sites. It lists steps to sample, label, and send samples to a lab.

Farm / unit: _____ Date: _____ By: _____

1. Choose the sampling areas
2. Divide areas by soil type
3. Clear surface litter
4. Collect samples with a clean tool
5. Combine samples in a clean bucket
6. Label each sample
7. Fill out the lab form
8. Send samples to the lab
9. Record results in your file

YOUR NOTES

TIP Use the lab's own sampling instructions, since different tests need different handling and depths.
