Hickory Management Guide

A hickory management guide for owners of hickory trees in woodlands. It lists steps for stand checks, thinning, nut use, and care.

Farm / unit: _____ Date: _____ By: _____

1. Map the hickory trees
2. Identify species present
3. Check tree health
4. Note crown condition
5. Plan thinning
6. Protect nut-bearing trees
7. Watch for pests and disease
8. Plan wildlife use
9. Review the stand each year

YOUR NOTES

TIP Consult your forester before cutting hickory, since the trees are valuable for wildlife and for wood.
