Native Tree & Shrub Selection Guide

A native tree and shrub selection guide for choosing plants that suit your site. Use it to match species to soil, light, moisture, and your goals.

Farm / unit: _____ Date: _____ By: _____

1. Describe your site conditions
2. List your planting goals
3. Check soil drainage
4. Note available sunlight
5. Find native species lists
6. Compare mature size to space
7. Check wildlife value
8. Confirm local seed sources
9. Record the final selection

YOUR NOTES

TIP Ask your extension office or state forestry agency for native species lists suited to your area.
