Timber Harvest Plan Template

A timber harvest plan template for laying out a harvest before any trees are cut. It helps landowners define the area, access, products, and protections for soil and water.

Farm / unit: _____ Date: _____ By: _____

Landowner and contact

Harvest area description

Objectives

Species and products

Access and landings

Skid trail layout

Water protection measures

Regeneration plan

Cleanup and closeout

TIP Check state notification and permit rules with your forestry agency before scheduling any harvest work.
