Tree Survival Assessment Form

A tree survival assessment form for counting how many planted trees are alive and healthy. Landowners use it to judge a planting and decide on replanting.

Farm / unit: _____ Date: _____ By: _____

Planting unit name _____

Date assessed _____

Species planted _____

Sample plots checked _____

Live seedlings counted _____

Dead seedlings counted _____

Likely cause of loss _____

Competing vegetation notes _____

Replanting needed _____

NOTES / CALCULATIONS

TIP Assess in the same season each year so counts are comparable and any cost-share reporting stays consistent.
