Utility Line Vegetation Management

A utility line vegetation management guide for owners and crews working near lines. It lists planning and coordination steps to keep work safe and reliable.

Farm / unit: _____ Date: _____ By: _____

1. Contact the utility first
2. Identify nearby lines
3. Mark trees to manage
4. Plan safe work zones
5. Confirm who may do the work
6. Use proper equipment
7. Handle debris and slash
8. Record what was done
9. Plan follow-up inspection

YOUR NOTES

TIP Never work near energized lines yourself. Call the utility and let qualified line clearance crews do the work.
