Wildfire Risk Assessment for Woodlands

A wildfire risk assessment worksheet for woodland properties. Use it to rate access, fuels, slope, and water sources so you can decide what protective work comes first.

Farm / unit: _____ Date: _____ By: _____

Property location _____

Slope and aspect _____

Fuel type and density _____

Distance to buildings _____

Road access for engines _____

Water sources nearby _____

Past fire history _____

Local fire season notes _____

Top mitigation steps _____

NOTES / CALCULATIONS

TIP Ask your local fire department to review your findings, since they know which gaps matter most for response.
