Wildlife Food Plot in Forests

A guide to planting wildlife food plots in forests. It covers steps for choosing a spot, preparing the soil, and caring for the plot.

Farm / unit: _____ Date: _____ By: _____

1. Choose a suitable clearing
2. Check sunlight and drainage
3. Test the soil
4. Prepare the seedbed
5. Select seed for your goals
6. Plant at the right season
7. Control weeds and competition
8. Protect nearby streams
9. Review plot results

YOUR NOTES

TIP Contact your state wildlife agency before planting, since rules on food plots and baiting vary by state.
