Citrus Production Guide

A production guide for citrus growers. It covers variety, planting, cold protection, feeding, pest watch, and harvest, with space for grove or backyard notes. Keep a printed copy handy and fill it in as you work.

Farm / unit: _____ Date: _____ By: _____

1. Choose varieties for your climate
2. Plant in a protected, sunny site
3. Use rootstocks suited to soil
4. Water and feed per local advice
5. Plan cold protection
6. Watch for pests and greening
7. Prune lightly for light and air
8. Harvest by taste and maturity

YOUR NOTES

TIP Check state agriculture rules on citrus plant movement and disease before buying or moving trees.
