Container Gardening Guide

A short reference on growing vegetables, herbs, and flowers in containers. Use it for patios, small farms, and market starts where space is limited. Use a fresh copy each season and keep old ones for comparison.

Farm / unit: _____ Date: _____ By: _____

1. Pick a container with drainage holes
2. Match container size to crop
3. Use a quality potting mix
4. Place pots where light fits the crop
5. Plan a watering routine
6. Feed on a regular schedule per label
7. Support tall or vining plants
8. Watch for pests and tip over damage

YOUR NOTES

TIP Containers dry out faster than beds, so check moisture often in warm weather and write down what each crop needs.
