Disease Forecasting for Horticulture

A guide to using disease forecasting in horticulture. It shows growers how to track weather, risk models, and action steps. Print a copy for each season and keep the filled pages with your farm records.

Farm / unit: _____ Date: _____ By: _____

1. Pick diseases to forecast
2. Find a local weather station
3. Choose a forecasting tool
4. Record weather by day
5. Check risk levels from the model
6. Scout fields when risk is high
7. Decide on action using the label
8. Record results each season

YOUR NOTES

TIP Use forecasting tools from your state extension and follow product labels for any treatment.
