Drip Irrigation for Vegetables

A reference for setting up and running drip irrigation on vegetables. Gardeners and growers follow the steps to lay out tape or line, filter water, and keep emitters working.

Farm / unit: _____ Date: _____ By: _____

1. Map beds and water source
2. Install filter and pressure regulator
3. Lay mainline and header
4. Place drip tape or line per bed
5. Check emitters for even flow
6. Flush lines per the manufacturer
7. Inspect for leaks and damage
8. Plan winter drain and storage

YOUR NOTES

TIP Follow the manufacturer manual for pressure and flow, and flush lines on a routine schedule you write down.
