High Tunnel Production Guide

A planning guide for growing crops in a high tunnel. Farmers use it to think through site, crop choice, climate control, and season extension from set-up through harvest.

Farm / unit: _____ Date: _____ By: _____

1. Pick a level, well-drained site
2. Check local rules and permits
3. Choose crops that suit the season
4. Plan soil prep and fertility
5. Set up irrigation under the cover
6. Plan venting for warm days
7. Plan for snow and wind safety
8. Keep records of each crop cycle

YOUR NOTES

TIP The NRCS has a high tunnel program, so ask your local office about current options before building.
