# Irrigation Water Testing for Horticulture

A guide to testing irrigation water for horticulture. It covers sampling and what to record so growers know whether water suits crops and food safety needs.

Farm / unit: _____ Date: _____ By: _____

1. Choose a certified lab
2. Get proper sample bottles
3. Collect from the actual use point
4. Label sample details clearly
5. Ship on time per the lab
6. Review results with extension
7. Check food safety limits
8. Record action taken

**YOUR NOTES**

**TIP** Ask your extension office which tests matter for your crops and water source.
