Horticulture & Specialty Crops | WORKSHEET

Soil Mix Formulation Worksheet

Work out a soil mix formula for containers or beds. Growers list each component, its purpose, and results so a mix can be repeated or improved.

Farm / unit: _____ Date: _____ By: _____

Mix name and intended crop _____

Base material used _____

Drainage material used _____

Organic matter source _____

Amendments added per label _____

Mixing method and batch size _____

Test results for pH and salts _____

Crop response notes _____

NOTES / CALCULATIONS

TIP Test each new mix before filling many pots, and record the formula so you can repeat it.
