Transplant Production Timeline

Map out a transplant production timeline from seed order to field setting. Greenhouse and market growers use it to work backward from planting dates and keep trays on schedule.

Farm / unit: _____ Date: _____ By: _____

Crop and variety _____

Target field planting date _____

Seed order date _____

Sowing date and notes _____

Pot-up or tray change date _____

Hardening-off start and notes _____

Field-ready check and notes _____

Notes on losses or delays _____

NOTES / CALCULATIONS

TIP Work backward from your field date and leave slack for weather delays; record what you changed for next year.
