Vegetable Crop Rotation Plan

Plan a vegetable crop rotation across beds or fields so related crops do not follow each other. Growers use it to track plant families and what grew where each season.

Farm / unit: _____ Date: _____ By: _____

Bed or field name _____

Crop grown last season _____

Plant family of that crop _____

Crop planned this season _____

Crop planned next season _____

Cover crop in the gap _____

Disease or pest issues noted _____

Soil amendments planned _____

NOTES / CALCULATIONS

TIP Group crops by plant family before you assign beds, then check your plan against notes on earlier problems.
