Vegetable Pest Identification Guide

A reference for telling common vegetable pests apart. Growers use it to note what they see, check the leaf and plant clues, and decide who to call for help.

Farm / unit: _____ Date: _____ By: _____

1. Check both sides of leaves
2. Note the crop and growth stage
3. Describe the damage pattern
4. Look for insects, eggs, or frass
5. Take clear photos for reference
6. Compare with extension photos
7. Decide if action is needed
8. Record what you found and did

YOUR NOTES

TIP When unsure, bring a sample or photos to your extension office for identification before spraying anything.
