Machinery & Equipment | WORKSHEET

Electrical System Troubleshooting Worksheet

A worksheet to walk through electrical problems on farm machinery, helping you record symptoms, tests, and findings in order so the fault is found without guesswork.

Farm / unit: _____ Date: _____ By: _____

Machine and unit name _____

Symptom and when it started _____

Battery and terminal condition _____

Fuses and relays checked _____

Connectors and grounds inspected _____

Wiring harness damage found _____

Test results and tool used _____

Part replaced or repaired _____

Final outcome and date _____

NOTES / CALCULATIONS

TIP Disconnect power per the service manual before touching wiring, and change one thing at a time so you can trace the cause.
