Farm Machinery Lockout/Tagout Procedure Template

A lockout and tagout procedure template for farm machinery, giving owners an outline to write their own steps for shutting down, locking, and verifying a machine is safe to service.

Farm / unit: _____ Date: _____ By: _____

Purpose and scope of procedure

Machines and energy sources covered

Who is authorized to lock out

Steps to notify workers

Steps to shut down the machine

Steps to isolate and lock energy

How to release stored energy

How to verify zero energy

Steps for removing locks and restart

TIP Adapt this outline to each machine and check OSHA guidance to confirm what applies to your operation.
