# Hand Signal Guide for Farm Equipment

A hand signal guide for farm equipment crews, giving an agreed set of signals to use when voice or radio is hard to hear, such as around tractors and loaders.

Farm / unit: _____ Date: _____ By: _____

1. Agree on one signaler for each job
2. Make eye contact before signaling
3. Signal to start the machine
4. Signal to stop everything at once
5. Signal to move forward or back
6. Signal to raise or lower the implement
7. Signal to turn left or right
8. Signal to shut the engine off
9. Review and practice with every worker

**YOUR NOTES**

**TIP** Train everyone on the same signals before the season and keep this sheet in the cab where operators can see it.
